

Fall 09
CS 45201 – 600
Computer Communication Networks
Department of Computer Science, Kent State University Stark

TR 5:30 PM – 6:45 PM - Room MH 303

Instructor: [Dr. Angela Guercio](#)

Office: 424, Main Hall **Phone:** 330 244-3424 (KSU ext. 53424)

Office Hours: TR 10:00am - 10:55am 12:25pm - 1:55pm 4:55pm - 5:25pm

other times are available by appointment

Best way to contact me: e-mail to aguercio@kent.edu

Course Information
Class Webpage: http://www.personal.kent.edu/~aguercio/Fall09/CS45201-600Fa09.html - all important class information will be posted on the class webpage, readings, assignments, notes, deadlines, cancellations, etc.. - You must CHECK THE CLASS WEBSITE REGULARLY!!!
Prerequisites: CS 33211 Operating Systems For more details, visit http://www.cs.kent.edu/programs/ugrad/planner.html
Credit: 3 Credit Hours
Required Text: Andrew S. Tanenbaum - <i>Computer Networks</i> - Prentice Hall; 4 th ed., 2002, ISBN-13: 978-0130661029 Companion site of the required textbook: http://authors.phptr.com/tanenbaumcn4/ Other recommended texts: - James F. Kurose, Keith W. Ross, <i>Computer Networking</i>, 3rd edition, Addison Wesley, 2004. - William Stallings, <i>Data and Computer Networks</i>, 7th edition (or 6th). Prentice-Hall, 2004. - Douglas Comer, <i>Internetworking with TCP/IP</i>, 3th edition, Prentice-Hall. Multiple volumes

Emergency: In case of an emergency please contact the security on campus.

Security phone on campus: #53123

Security cell phone (330) 705-0430 or, of course, 911.

I recommend that you program into your cell phone the previous numbers.

Course Outline and Objectives

This course is an introduction to net-centric systems, data communication protocols, network architectures, routing protocols, network management, congestion control, network security, compression techniques, mobile and wireless networks, and the World Wide Web as an example of a client-server system.

Students will

- learn the theoretical base for data communication
- become familiar with protocols of communication;
- deepen the knowledge of the network components;
- learn how to measure the performance in computer network;
- analyze the problems of routing and congestion on a network
- study the applications that run over a network
- understand how to perform secure data transmission

The course satisfies a requirement for the Computer Science major and minor.

Class Requirements and Expectations

- **Regular class attendance is REQUIRED.**

 There tends to be a strong correlation between class attendance and grade performance. If you will miss a class, **let me know ahead of time**. In any case, you are responsible for bringing yourself up to date on class material and assignments.

 Since class participation and regular attendance are part of the final grade, **if you miss more than 4 classes without a documented reason or without making prior arrangements with me, your final grade will be dropped one grade (A to B, B+ to C+ and so on).**

- **Reading ahead is REQUIRED.**

 The readings are posted online on the class webpage. You must read the material **before** class **and again after** the class.

 Regular study of the material is REQUIRED.

- **COMPLETE the assigned homework (i.e. projects and exercises).**

 There will be 5 assignments in the course. I will retain the right to change the number of assignments if necessary.

 The class webpage will list the assignments for each week at the beginning of that week so that you can better schedule your work.

- **REVIEW the graded Homework/Projects.**

 Homework and Projects will be graded and difficulties will be discussed in class. Review the mistakes after discussion and learn from them.

 Late Homework/Projects will not be accepted if returned after the solution is given or discussed.

 If you have difficulties doing your homework or your project please contact me or come to see me. **Do not procrastinate! Homework and Projects should be started immediately.**

- **Return work ON TIME**

 All the homework and project should be in electronic format and e-mailed as an attachment to aguercio@kent.edu. Multiple files should be zipped. In any case a printed copy MUST be returned to the instructor as well unless stated otherwise.

 All the printed copies of the Homework or the Projects are due **before or at the beginning of class**. All assignments, either printed or submitted via e-mail, turned in one day late will get **3 points per day penalty** including those returned after the beginning of class.

 For all Homework or Projects that are e-mailed, the instructor will acknowledge the receipt within 24 hours via e-mail. The time of your e-mail will be compared against the work deadline. The reply is your receipt that the work has been turned in (not that it is correct!). If you do not receive a receipt, it is YOUR responsibility to contact me to see if the assignment has been lost in transmission. **Important:** once you submit your files **DO NOT OPEN THEM AGAIN!** If your e-mail didn't reach me or something happened to your files, I may need to ask you to resubmit your files by logging on in my presence to check the modification dates on your files and make sure that they haven't been modified after the due date.

What to expect to find in your Computer Communication Networks class

- The class should be interactive. In-class exercises are designed to encourage participation. There will be cooperation between you and I, open discussions about problems and possible solutions. You are responsible for taking good notes.
- You will be exposed to traditional lecture methods on the blackboard as well as PowerPoint presentations. You will participate in group activities and collaborative learning will be used to discuss possible solutions to problems as well as to provide critical observation to problem solutions. Formal and informal groups will be formed in class to work together. In some cases, you will be required to work on your own. In those cases, I expect appropriate academic behavior from you. Exchange of information, when forbidden, will not be tolerated.
- In this course you will work both with and without a computer. The projects are designed to complement the theoretical studies and deepen your understanding of the communication over a network. To such a aim appropriate exercises will be selected.

The Secret Key (not so secret after all!) of how to succeed in this CS class is to:

1. work conscientiously and do all the homework that has been assigned;
2. extrapolate, from the examples provided to you, techniques and answers to problems;
3. spend several hours to solve problems as well as reading material;
4. be alert and participate in class discussions;
5. learn from other people mistakes;
6. be critical of your own work. Question every step you are making; ask yourself “Is this step correct?” “Are there other easier or alternative and more efficient steps? Did I use the theory in the appropriate way?”
7. attend class regularly;
8. spend time studying the theoretical concepts. Memory helps, but it is practice that reinforces the theory;
9. do all the above consistently through the whole semester, be confident about what you are doing and don’t be afraid to ask for help;
10. Think, think, think.... and enjoy!

I am very confident that you can make the above commitment and that you can maintain it during the semester. I am sure that you have all the ability to be successful!

Exams

- ✎ There will be 2 100-points Mid-Term Exams which will cover the topics of the previous 5 weeks.
- ✎ The 100-points Final Exam will cover the topics of the last 5 weeks of the course.
- ✎ All exams are closed books, closed notes.
- ✎ Retake exams are not available.
- ✎ Make-up exams will only be given in case of serious need (written verification for your inability to take an exam is required) and only when I have been notified **prior** to the exam being issued, otherwise you are considered absent for that exam and the grade of your exam is automatically 0.

Grading

Your grade will be based on

1. Your homework/projects
2. Your participation in discussions concerning the homework/projects and class topics
3. Your participation in class discussions about reading material
4. Your attendance in class
5. Your exams

Participation	5%
Homework and Projects	35%
Exam 1 and 2	40%
Final Exam	20%

Points	Grade
92.5-100	A
89.5-92.4	A-
87-89.5	B+
82.5-86.9	B
79.8-82.4	B-
77-79.8	C+
72-76.9	C
70-72	C-
60-69.9	D
00-59.9	F

Even though I have never found it necessary to change the grading distribution and the number of assignments and exams specified in the syllabus during the semester,

I reserve the right to change the method of assigning grades, including changing the number of assignments or exams if I consider it necessary.

Course Withdrawal

If you are considering withdrawing from this course, please inform your instructor and consult with a staff member in the Student Services Office, 134 Main Hall. Withdrawal from a course can affect financial aid, student status, or progress within your major. For withdrawal deadlines, please refer to http://www.registrars.kent.edu/home/TermUpdate/sche_adj.htm.

Academic Honesty Policy

When assignments must be individually and independently done, if some students turn in substantially the same solution or program of another student, in my judgment, the solution will be considered a group effort. All involved in the group effort homework will receive a zero grade for that assignment. Policy on academic dishonesty involving programming can be found at <http://www.cs.kent.edu/programs/grad/DishonestyPolicy.pdf>.

Use of the intellectual property of others without attributing it to them is considered a serious academic offense. Cheating or plagiarism will result in a failing grade for the work or for the entire course. Repeat offenses result in dismissal from the University. University guidelines require that all infractions be reported to the Student Conduct Officer on our campus.

Students with Disabilities

Kent State University recognizes its responsibility for creating an institution atmosphere in which students with disabilities can succeed. In accordance with University Policy Subpart E...104.44, if you have a documented disability, you may request accommodations to obtain equal access in this class. Please contact the disability coordinator on campus, Kelly Kulick in Student Accessibility Services, located in the Student Success Center, lower level of the Campus Center, phone (330) 244-5047, or kkulick@kent.edu. After your eligibility for accommodations is determined, you will be given a letter which, when presented to instructors, will help us know best how to assist you.

Classes Canceled – Campus Closings

Announcements of class cancellations and/or campus closings will be made on the campus home page. In the case of an emergency, weather-related or otherwise, please check the web page at stark.kent.edu for information on the buildings and times of the closing. While information may be broadcast by radio and television, this should be confirmed by the web page, which is the official announcement of the campus and which will be the information used to determine issues related to student attendance, rescheduling of tests, and other concerns.

Conduct

Students and faculty behavior at the Stark Campus is governed by the guidelines set forth in *The Digest of Rules and Regulations*. That document can be found in

the University telephone directory. Information can be found at the Office of Judicial Affairs at <http://www.kent.edu/administration/emsajudicial.cfm>.

Recycling

KSU Stark Campus recycles! Recycling saves energy, which is currently generated by expensive and vanishing fossil fuels. Recycling one aluminum can saves enough energy to run a TV for three hours! Please take a few seconds to separate your trash. Aluminum cans and plastic and glass bottles may be placed in the blue recycling bins, and all types of paper may be placed in the blue recycling trash cans. All other waste may be placed in the black, brown or gray trash cans.

Important Dates to Remember

- Last day to withdraw ***before grade W*** is assigned, is Sept.13, 2009
- Last day to drop the class is Nov. 8, 2009
- Exam 1 is Thursday, Oct 1
- Exam 2 is Thursday, Nov 10
- Final Exam is Thursday, Dec. 17 (6:00 pm – 8:00pm)

Thanksgiving Recess: Nov. 25 – Nov. 29

Classes End: Dec. 17, 2009

Tentative Outline of the Course

	Month/Day	Weekday	Topic
1	Sept 1	T	Introduction to Computer Communication Networks course
2	Sept 3	R	Internet Architecture
3	Sept 8	T	Physical Layer
4	Sept 10	R	Physical Layer
5	Sept 15	T	Physical Layer
6	Sept 17	R	Link Layer
7	Sept 22	T	Link Layer
8	Sept 24	R	Link Layer
9	Sept 29	T	Review
10	Oct 1	R	Exam 1 (Ch 1-3)
11	Oct 6	T	Medium Access Control (MAC) Sublayer
12	Oct 8	R	MAC Sublayer

13	Oct 13	T	MAC Sublayer
14	Oct 15	R	MAC Sublayer
15	Oct 20	T	Intro to Network Layer
16	Oct 22	R	The Network Layer – Routing and Routers
17	Oct 27	T	The Network Layer – Congestion Control
18	Oct 29	R	The Network Layer – Quality of Service
19	Nov 3	T	The Network Layer – Internetworking - IP
20	Nov 5	R	Review
21	Nov 10	T	Exam 2 (Ch 4-5)
22	Nov 12	R	The Transport Layer – Services - Protocol
23	Nov 17	T	The Transport Layer – TCP, UDP - Performance
24	Nov 19	R	The Application Layer
25	Nov 24	T	The Application Layer
	Nov 25-29		Thanksgiving Recess
26	Dec 1	T	The Application Layer: Multimedia
27	Dec 3	R	The Application Layer/Security
28	Dec 8	T	Network Security
29	Dec 10	R	Review for final
30	Dec 17	R	6:00 pm - 8:00pm - Final Exam
