Lab 2 Assignment

For our second lab assignment, I would like you to read "Simple Gifts and Buried Treasures", an article from the Sedimentary Record, a research journal published by SEPM, the Society for Sedimentary Geology.

The full reference for the article is:

You can find the article by clicking on the following link and by downloading vol. 1 number 2 from the web.

http://www.sepm.org/sedrecord/home.htm

We will discuss this paper in Lab on Wednesday. Please read through the article and write a one page, typed summary and evaluation of the article. Your evaluation should discuss your perspective on the paper, discussing for example, why the work is novel, and interesting. The summary should be turned in at the start of lab.

We will spend the lab period discussing the article and related material covered in the lectures.

See you in class!

cheers,

Joe
