¹Please note that this refers to the **LECTURES** covered by the exams (Not the chapters). The Class Schedule shows the **CHAPTERS** which are targeted for each lecture (subject to modification as needed).

Mini tests are normally available the Saturday after the material is covered in class (by 5 p.m.) for a minimum of eight days. The deadline is listed in the description for each mini-test. Should a change in this preliminary schedule be necessary there will be an announcement on the class website and the revised deadline will be included in the test description.

*No mini tests will expire until after the 2nd week drop/add deadline listed above. This allows students who add the class "late" an opportunity to catch up (and gives students who are having problems accessing the tests time to work out the bugs).

ACKNOWLEDGEMENTS: The concept for the way in which this course is offered, the approach to testing, and portions of the syllabus are based on the Principles of Marketing class offered by Dr. Bruce Robertson, San Francisco State University (http://online.sfsu.edu/~robertbc/). Many thanks to Dr. Robertson for pioneering this method of delivery.

- Three attempts for each ELEC. Each is worth up to .3% added to your final course grade.
- Unlike the mini-tests, for the ELEC's I will record your **best ELEC grade** (for the mini-tests, I record the grade on you LAST attempt).
- You can earn partial credit for less than 100% on the assignment.
 - If you earn an 80% on your best attempt, you get .8 x .3 or .24% added to your Final Course Grade
- Earning a 100% on one ELEC will add .3% TO YOUR FINAL GRADE.
- So, for the 10 assignments you can earn up to a total of a 3% INCREASE in your course grade!!

Introduction to Marketing 25010

I)	Initial Background information: This is based on the syllabus, available from the class web site on Blackboard Learn. You should <i>print</i> and <i>read</i> that document.
	a) The Professor and his contact information:
	Name: Dr. Lawrence J. Marks
	E-mail: lmarks@kent.edu
	Office:
	Phone: 330-672-1266
	Office Hours:
	Instructor's personal website: http://www.personal.kent.edu/~lmarks
	a) Required Text: The required text for the class is Marketing, 12th edition, Roger A. Kerin, Steven W. Hartley, and William Rudelius, McGraw-Hill 2015. It is available packaged with ConnectPlus access at no additional charge in a special Kent State loose leaf edition (ISBN: 9781259332456). The "standard" edition's ISBN is 9780077861032.
	b) McGraw-Hill ConnectPlus is a web-based assignment and assessment site that we will use for Enhanced Learning Extra Credit Assignments (ELECs). THIS IS INCLUDED WITH THE KSU EDITION OF THE REQUIRED TEXTBOOK.

II) The Prerequisite for this class is:

III) Course Objectives

- a) A working knowledge of marketing terminology, concepts, activities, and strategies;
- b) An understanding of marketing functions within the organization and in the context of external environments;
- c) Knowledge of the ways in which marketing contributes to attainment of the organization's objectives and goals;
- d) Developed quantitative and qualitative analytical skills to apply marketing concepts, theories, and tools to solve marketing problems;
- e) An appreciation for the global and ethical aspects of marketing.

IV) Policies

The Following Policies Apply to All Students in this Course:

- A. Students attending the course who do not have the proper prerequisite risk being deregistered from the class.
- B. Students have responsibility to ensure they are properly enrolled in classes. You are advised to review your official class schedule (using Student Tools on FlashLine) during the first two weeks of the semester to ensure you are properly enrolled in this class and section. Should you find an error in your class schedule, you have until Sunday, September 7, 2014 to correct the error. If registration errors are not corrected by this date and you continue to attend and participate in classes for which you are not officially enrolled, you are advised now that you will not receive a grade at the conclusion of the semester for any class in which you are not properly registered
- C. Academic Honesty: Cheating means to misrepresent the source, nature, or other conditions of your academic work (e.g., tests, papers, projects, assignments) so as to get undeserved credit. The use of the intellectual property of others without giving them appropriate credit is a serious academic offense. It is the University's policy that cheating or plagiarism result in receiving a failing grade (0 points) for the work or course. Repeat offenses may result in dismissal from the University. For an excellent review of the topic, browse http://ec.hku.hk/plagiarism/introduction.htm. For a PowerPoint presentation that reviews the topic of cheating and plagiarism (and which reflects my views), browse http://www.personal.kent.edu/~lmarks/ethics/Plagiarism.ppt. NOTE: The questions for the mini tests are copyrighted and unauthorized reproduction is prohibited.
- D. Course Withdrawal Deadline: For Fall 2014, the course withdrawal deadline is Sunday, November 2, 2014. If you need advising assistance, you will need to contact an advisor before Friday, October 31, as our advising offices are not open on the weekend.
- E. Students with disabilities: University policy 3 -01.3 requires that students with disabilities be provided reasonable accommodations to ensure their equal access to course content. If you have a documented disability and require accommodations, please contact the instructor at the beginning of the semester to make arrangements for necessary classroom adjustments. Please note, you must first verify your eligibility for these through Student Accessibility Services (contact 330-672-3391 or visit http://www.kent.edu/sas for more information on registration procedures).

INTERNATIONAL Students for whom English is a second language, send me an email to request Extended Time. Once I verify your status, I will give you access to the Extended Time mini-tests, midterm and final.

F. Application for Graduation

It is your responsibility to apply for graduation before the set deadline. If you apply after the deadline you will be assessed a \$200 late fee. Please see your academic advisor as soon as possible if you

are uncertain as to your progress toward graduation. The graduation application deadlines are follows:

Graduation Application Deadlines:

May Graduation: Apply before September 15th August Graduation: Apply before December 15th December Graduation: Apply before March 15th

To apply for graduation complete the following steps:
Log onto your Flashline account
Click on the Student Tools tab
Look in the Graduation Planning Tool Box
Click on Application for Graduation
If an error message appears, you must contact your advisor.

VII) Grades

Th	e Course Grade is based on		
a)	13 "mini" exams (%	of your final grade), and
b)	a midterm exam worth		% of your final grade, and
c)	a final examination worth		% of your final grade.
d)	PLUS any		

Letter grades

Course Average	Course Grade	Univ. GPA	Course Average	Course Grade	Univ. GPA
92.6+%	Α	4.0	76.6-79.5%	C+	2.3
89.6-92.5%	A-	3.7	72.6-76.5%	С	2.0
86.6-89.5%	B+	3.3	69.6-72.5%	C-	1.7
82.6-86.5%	В	3.0	66.6-69.5%	D+	1.3
79.6-82.5%	B-	2.7	59.6-66.5%	D	1.0
			59.5 and below	F	0.0

Students who want to become Marketing Majors must earn a "C" (2.0) or better in this course. A "C-" (1.7) does not meet this College of Business requirement.

The class DOES use the plus/minus grading system.

IMPORTANT NOTE: Once the grades are in, students <u>get what they have earned</u>. I do not make adjustments for (a) you really, really needing a better grade, (b) your being "only" .3, .2, or .1 away from the next grade, or for (c) any reason other than an error in the calculation. Asking, pleading, crying, and/or offering bribes DO NOT WORK (sorry).

VIII) Calculating your final grade

It is fairly common for students to incorrectly calculate their final grade. The correct calculation is:

[(Total of all Mini test scores/13) \times .5] + (Midterm score \times .2) + (Final exam score \times .3) + extra credit = Final Course Grade

Notes: (1.) A missed mini-test counts as a 0. (2.) Adding your total points up and dividing by 15 is NOT the correct calculation.

For example, suppose you have an average of 85% on the 13 mini-tests, a 70% on the midterm, a 78% on the final exam, and you earned 2.5% in extra credit work.

The grade calculation is: $(.85 \times .5) + (.70 \times .2) + (.78 \times .3) + 2.5 = .425 + .14 + .234 + .025 = .824$ or 82.4% which would be a "B-" for the course. Needless to say, had you done more extra credit your final course grade would have been higher (for example, adding .5 in extra credit would have earned you an 82.9% or a "B" for the course).

You can download a Grade Calculator Blackboard Learn as a click in the Testing Folder. This is an Excel spreadsheet that will help you calculate how you are doing.

You can download a Grade Calculator from the Blackboard Testing Folders. This is a spreadsheet that will help you calculate how you are doing.

IMPORTANT NOTES about course grades.

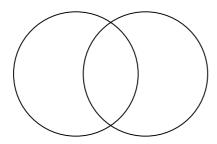

- 1. YOU need to watch for deadlines for mini-tests and extra credit assignments. Once an assignment closes, it is very rare for it to be re-opened. If you have a question about an assignment/mini-test ask about it BEFORE the deadline. This means YOU need to check on your grades and be aware of the deadlines. Once we get to finals week, all mini-tests and extra credit opportunities will have been closed. Do them before their weekly deadlines. DO NOT FORGET TO TAKE THE MINI-TESTS.
- 2. Once the final is taken, your Final Course Grade is calculated using the above formula [(Total of all Mini test scores/8) x .5] + (Midterm exam score x .3) + (Final exam score x .2) + Extra Credit
- 3. THERE ARE NO CHANGES to final course grades made for "being close" to the next higher grade, nor for "only being .1 away" from the next higher grade, nor for "really, really needing" the next higher grade. Students receive the grade that they have earned.

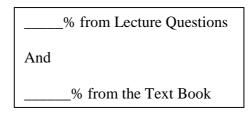

The only possible adjustment to a final course grade occurs when a curve is needed (or if a posting error is made). IF, at the end of finals, there are not a reasonable number of A's (or, if too many students are failing), it is possible that a curve will be created. In this case, a set number of points will be added to everyone's final course grade. Should this occur, students will be informed via e-mail.

Did I mention that, when it comes to changing the grade which you have earned, asking, pleading, crying, and/or offering bribes DO NOT WORK?

XVI) AMA Ethics Statement

http://www.marketingpower.com/AboutAMA/Pages/Statement%20of%20Ethics.aspx

http://www.marketingpower.com/AboutAMA/Pages/Statement%20of%20Ethics.aspx

PREAMBLE

The American Marketing Association commits itself to promoting the highest standard of professional ethical norms and values for its members

(practitioners, academics and students). Norms are established standards of conduct that are expected and maintained by society and/or professional

organizations. Values represent the collective conception of what communities find desirable, important and morally proper. Values also serve as the criteria for evaluating our own personal actions and the actions of others. As marketers, we recognize that we not only serve our organizations but also act as stewards of society in creating, facilitating and executing the transactions that are part of the greater economy. In this role, marketers are expected to embrace the highest professional ethical norms and the ethical values implied by our responsibility toward multiple stakeholders (e.g., customers, employees, investors, peers, channel members, regulators and the host community).

ETHICAL NORMS - As Marketers, we must:

- 1. **Do no harm.** This means consciously avoiding harmful actions or omissions by embodying high ethical standards and adhering to all applicable laws and regulations in the choices we make.
- 2. **Foster trust in the marketing system.** This means striving for good faith and fair dealing so as to contribute toward the efficacy of the exchange

process as well as avoiding deception in product design, pricing, communication, and delivery of distribution.

3. **Embrace ethical values.** This means building relationships and enhancing consumer confidence in the integrity of marketing by affirming these

core values: honesty, responsibility, fairness, respect, transparency and citizenship.

ETHICAL VALUES

Honesty - to be forthright in dealings with customers and stakeholders. To this end, we will:

- ~Strive to be truthful in all situations and at all times.
- ~Offer products of value that do what we claim in our communications.
- ~Stand behind our products if they fail to deliver their claimed benefits.
- ~Honor our explicit and implicit commitments and promises.

Responsibility – to accept the consequences of our marketing decisions and strategies. To this end, we will:

- ~Strive to serve the needs of customers.
- ~Avoid using coercion with all stakeholders.
- ~Acknowledge the social obligations to stakeholders that come with increased marketing and economic power.
- ~Recognize our special commitments to vulnerable market segments such as children, seniors, the economically impoverished, market illiterates
- and others who may be substantially disadvantaged.
- ~Consider environmental stewardship in our decision-making.

Fairness – to balance justly the needs of the buyer with the interests of the seller. To this end, we will:

- ~Represent products in a clear way in selling, advertising and other forms of communication; this includes the avoidance of false, misleading and
- deceptive promotion.
- ~Reject manipulations and sales tactics that harm customer trust.

Refuse to engage in price fixing, predatory pricing, price gouging or "bait-and-switch" tactics.

~Avoid knowing participation in conflicts of interest.

Seek to protect the private information of customers, employees and partners.

Respect – to acknowledge the basic human dignity of all stakeholders. To this end, we will:

~Value individual differences and avoid stereotyping customers or depicting demographic groups (e.g., gender, race, sexual orientation) in a negative or dehumanizing way.

- ~Listen to the needs of customers and make all reasonable efforts to monitor and improve their satisfaction on an ongoing basis.
- ~Make every effort to understand and respectfully treat buyers, suppliers, intermediaries and distributors from all cultures.
- ~Acknowledge the contributions of others, such as consultants, employees and coworkers, to marketing endeavors.
- ~Treat everyone, including our competitors, as we would wish to be treated.

Transparency - to create a spirit of openness in marketing operations. To this end, we will:

- ~Strive to communicate clearly with all constituencies.
- ~Accept constructive criticism from customers and other stakeholders.
- ~Explain and take appropriate action regarding significant product or service risks, component substitutions or other foreseeable eventualities that
- could affect customers or their perception of the purchase decision.
- ~Disclose list prices and terms of financing as well as available price deals and adjustments.

Citizenship – to fulfill the economic, legal, philanthropic and societal responsibilities that serve stakeholders. To this end, we will:

- ~Strive to protect the ecological environment in the execution of marketing campaigns.
- ~Give back to the community through volunteerism and charitable donations.

Contribute to the overall betterment of marketing and its reputation.

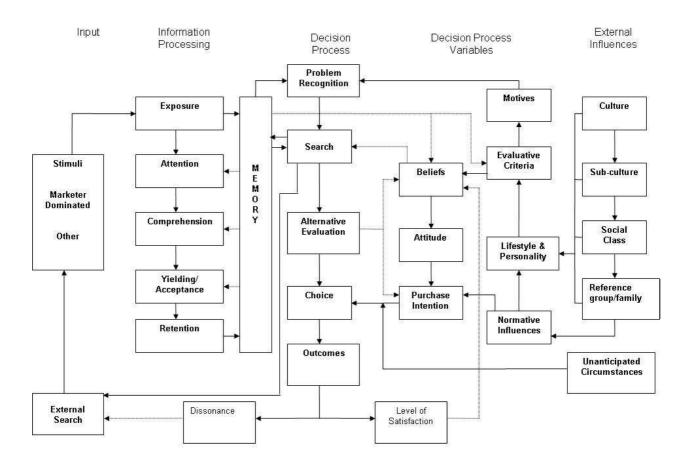

~Urge supply chain members to ensure that trade is fair for all participants, including producers in developing countries.

IMPLEMENTATION

We expect AMA members to be courageous and proactive in leading and/or aiding their organizations in the fulfillment of the explicit and implicit promises made to those stakeholders. We recognize that every industry sector and marketing sub-discipline (e.g., marketing research, e-commerce, Internet selling, direct marketing, and advertising) has its own specific ethical issues that require policies and commentary. An array of such codes can be accessed through links on the AMA Web site. Consistent with the principle of subsidiarity (solving issues at the level where the expertise resides), we encourage all such groups to develop and/or refine their industry and discipline-specific codes of ethics to supplement these guiding ethical norms and values.

Chapter 9 -- Market Segmentation, Targeting, and Positioning (STP)

Ι.	He	ewlett Packard – Printers (and more)
	a)	HP's Imaging and Printing Group (IPG) is "the leading imaging and printing systems provider in the world for printer hardware, printing supplies and scanning devices, providing solutions across from individual consumers to small and medium businesses to large enterprises."
	b)	How has it obtained this position?
	c)	History
		i) The 1980's
		ii) The 1990's
		iii) The 2000's
	d)	HP has been successful by finding them with appropriate products and services!!
	e)	FUTURE CHALLENGES:
ш	Ms	arkets
	a)	Groups of customers
	u)	with different wants, buying preferences or product-use behavior
		i) For example, what do YOU look for in a vacation?
	b)	– A market segment for
	,	which the seller chooses to design a marketing mix
	c)	Market Segmentation – The PROCESS of identifying and describing target markets
		i) Market Segmentation involves into groups, or segments, that:
		(1) Have common needs, and
		(2) Will respond similarly to a marketing action.

		ii)	We need to target our market segment by "positioning" our offe we need to define and describe the target market in detail.	r; BUT first
III.	Ma	arke	et Segmentation (another view)	
	a)		e process of dividing the total market for a good or service into snaller, internally homogenous (i.e.,) groups	
		i)	Members of each group are similar with respect to the factors the influence demand	nat
			(1) For example 3 types of cars:	
			(a)	
			(b)	
			(c)	
	b)	Se	gmentation Benefits and Challenges	
	,	i)	More efficient use of marketing resources	
		,	(1) Example	
		ii)	Can help to create rapid growth	
			(1) Example	
		iii)	Challenges – Be Careful	
			(1) Too much complexity can frustrate consumers	
			(a) Example:	
IV.	Pro	oce	ss of Market Segmentation	
	a)	lde	entify within a	_
		i)	Market research is used to explore this with CURRENT and PC consumers.	TENTIAL
		ii)	Cell phone Example What do people want in a cell phone?	
			(1) Texting?	
			(2) Web access	
			(3) Gaming Apps	1
			(4) Camera (or video?)	♦ 9
			(5) Music	

		(6) Fashion
		(7) Simple, low-tech
		(8) "Don't Care"
		(9) Business Users
		(10) For!
	b)	Identify the Characteristics that define the segment (what do prospective segments share that make them different from other segments with different needs/wants/desires?)
	Ex	ample:
	c)	Determine the of the segment and how well they
		are being by current offerings
		i) How large is the segment in terms of numbers, demand, and dollars (i.e., potential sales)?
		ii) How is their need (how dissatisfied are they with their current options)?
		iii) How is the existing competition?
		iv) FORECASTS can help to determine which segments are worth pursuing!
		 Note: See the textbook for "sales forecasting techniques" that may be very valuable here.
	d)	This should allow us to determine the size of the segment, the urgency of the
		need, and the strength of the competitionso,
		help determine whether or not this segment seems to
		be appealing for us
٧.	Ma	arket Segmentation Conditions that indicate a useful segment
	a)	The segment is Measurable and we can data
		about the segment
	Ex	ample:
	b)	Is the segment?

	e.g., The Cleveland Plain Dealer:
c)	Is the segment to be profitable for us?
	i) Creating a new product/service, advertising it, distributing it, facing down
	competition is all
	ii) Is there enough size, demand, and sales to provide the
	we will need?
	iii) In some cases, we can be successful by treating EACH customer as a separate segment through
Examp	oles:
	rket Segmentation – Grouping Buyers into Segments Based on the Customer's reason for?
	i) For personal use = Final Consumer
	ii) To use in the organization,
	to resell, or to make other products
B	lack and Decker and DeWalt Example:
Vid	leo: Felber on Market Segmentation at Felber & Felber
	(a) Felber & Felber has focused on the segment
	(b) There are many manufacturing companies doing well
	(c) Felber & Felber only needs a few of these to FOCUS on with their specialties
	(d) Green Marketing and Early Stage Clients
	(e) They apply what they learned from other clients to this segment
	wever, while useful, this is too broadso look at Consumer Market gmenation
b)	Bases for Segmenting Consumer Markets (from the figure):
	i) Geographics (Region, Size, Urban-rural, Climate)

- ii) Demographic (Income, age, gender, family life cycle, social class, education, occupation, ethnic background)
- iii) Psychographics (e.g., VALS)
- iv) Behavioral segmentation (Benefits desired, usage rates)
- v) Usage Rate

Examples	Ε	ха	m	р	les
----------	---	----	---	---	-----

(1)	by A	Age	Э

- (2) Psychographic Segmentation
 - (a) As the American population becomes more diverse and affluent, demographic researchers are changing the way they define segments of American society.
 - (b) ______ has defined 14 distinct groups of consumers based on recent Census and consumer data that emphasize income, age, and lifestyles. Segments of each group buy the same types of cars, read the same magazines, and watch the same television shows.

• Claritas' 14 segments are divided into 66 smaller clusters.

•	omotions, retail outlet selection, decisions ts/brands to offer in the area.
(3) Behavioral Segmentation	
(a)	_ is an "ideal" approach, but often hard to

- (i) Example: What are the benefits of wearing clothing that has label on the outside?
- (ii) Citicard example:
- (4) Usage Rate

IV. Classifying Products

- a) Consumer Goods
 - i) products purchased by the _____ consumer.

ii) Based on Durability/Tangibility Classification (goods-services continuum)

iii) Based on CONSUMER'S Interest

iv) CONVENIENCE PRODUCTS

- (1) Characteristics:
 - (a) Relatively Inexpensive
 - (b) Purchase is regular and recurring
 - (c) Little Thinking Involved
 - (d) Minimal Shopping Effort
 - (e) Bought a most convenient location
 - (f) "Staple" products, like groceries, and
 - (g) Impulse purchases (candy bar?)
- (2) STRATEGY:
 - (a) Make available in every possible place
 - (b) Must be visible inside the store
 - (c) Distribution is a major marketing mix factor
 - (d) Easy substitution by similar brands (consumer will accept another brand)

- (e) Extensive advertising is used
- v) Shopping Products
 - (1) CHARACTERISTICS:
 - (a) Product comparisons occur
 - (b) Consumer seek information
 - (c) Decisions are based on thought
 - (d) Relatively higher prices
 - (e) Often technology or fashion oriented
 - (f) Monetary & social risks
 - (g) Brand loyalty may be found
 - (2) STRATEGY:
 - (a) Selective distribution
 - (b) Consumers will seek products in less visible locations
 - (c) Product attributes and Quality are important
 - (d) Product differentiation is possible
- vi) Specialty Products
 - (1) CHARACTERISTICS:
 - (a) Substitutes are not accepted
 - (b) Infrequently purchased
 - (c) Extensive Search
 - (d) Brand loyalty may be strong
 - (e) Loyalty to retailer may be as important as brand selection
 - (f) May travel great distances to acquire
 - (2) STRATEGY:
 - (a) Limited distribution
 - (b) Consumers will seek products regardless of location
 - (c) Extensive product and price differentiation
 - (d) Strong brand image
- vii) Unsought Products
 - (1) CHARACTERISTICS:
 - (a) Consumer does not know about or does not want the product (initially)

- (b) Interest is likely caused by a "sudden or unexpected problem" (rain = umbrella; death = funeral plot)
- (c) The consumer is not likely to be loyal and will accept substitutes
- (2) STRATEGY:
 - (a) Limited distribution
 - (b) Need to advertise so consumers are aware when the need arises
 - (c) May require persistent and aggressive advertising and selling approach

Example: Spectrum Brands Segmented based on Consumer Markets

ν,					
	i)	Products that assist directly	y or indirectly in	providing products	for resale.

- Also called *B2B goods*, *industrial goods*, or *organizational goods*.

 (1) **Manufactured materials and component parts:** (electrical resistors,
- screws, electric motors, computer chips, spark plug)
- (2) **Process materials (raw materials):** used in production, become part of finished product (chemicals, wood, wheat, cotton)
- (3) **Installations:** primary production equipment and major capital items (buildings, computer hardware, assembly lines, oil drilling rig)
- (4) **Accessory equipment:** (Copiers, office equipment, cell phone, hand tools)
- (5) **M**aintenance, **R**epair, and **O**perating Supplies: facilitate routine operations (writing paper, staples, tape, Post-it notes)
- (6) **Services**: intangible product provided by others to facilitate the firm's production and operation (maintenance, repairs, trucking, security service, legal advice, consulting)

V. Product Development

h)

a)	The development of
b)	The continuous improvement of
•	·

- c) WHY bother?
 - i) Any company that does not innovate will eventually be crushed by competition or abandoned by its consumers

	iii) EXAMPLE: Innovation at two very different companies			
	(1) GOOGLE			
	(a) Ideas come from everyone in the company – even the finance team.			
	(b) Open information on every project – every idea, every deadline.			
	(c) Favor intelligence over experience.			
	(d) Employees get a free day each week to innovate – 50 percent of new products come from this time.			
(e) Don't politic for your idea, use data – eliminate 'I like' for real data				
	 (f) Give people a vision, rules how to get there and deadlines – creativity loves constraints. 			
	(g) Simple to use and easy to love – the money will follow this.			
	(2) Whirlpool			
	(a) Stick with it – it can take up to six years to attain a big payback.			
	(b) Innovation alone is not enough – need operational excellence as well.			
	(c) Be highly practical – inventions have to be something someone will buy.			
	(d) At Whirlpool, sales from new product ideas less than 5 years old were less than \$30 million; today they are more than \$1.2 billion!!			
VI. Dif	fering Perspectives of New Products			
a)	Newness Compared with Existing Products –			
	<u>"</u>

Chapter 12 -- Services Marketing

·					
Introduction					
"Ruby Tuesday Blows up Wrong Restaurant"					
The Point In SERVICES marketing, the "casual dining segment" HAS become a "sea sameness!"					
The industry is not longer providing customers with "Value."					
I. Services are a Major Factor in the U.S. economy in dollars and in jobs					
a) Over and million jobs!					
See Figure 12-1 page 300.					
II. SERVICES Defined					
a) Services are the or that an organization provides to consumers in exchange money or something else of value.					
III. Increase in Services Influenced by:					
a) Organizations' focus on productivity and profits					
i)					
b) Consumers'					
i) Personal Shoppers					
ii) Take out food					

IV. Affecting virtually all industries:

iii) House and lawn care

a) Location--ATMs, branch outlets, branch warehouses, JIT delivery

of

	b)	Lo	nger Business Hours	
	c)	Better trained sales and service people		
	d)	One-stop shopping		
	e)	lm	proved customer service systems (personal, phone, on-line)	
	f)	Мс	ore information availablebefore, during, and after the sale	
	g)	ΑC	DDS VALUE beyond issues of price and product quality	
٧.	TH	IΕι	JNIQUENESS OF SERVICES	
	a)	Fo	ur I's of Services	
		i)		
			(1) Services cannot be	
			(2) SO it is harder to	
			(3) Communications must make these	
			(4) Setting Price can be hard	
		ii)		
			(1) Lack of standardization;	
			(2) inconsistent delivery and quality depending	
			(3) Minimize by employee selection, training, and	
			(4) service performance standards.	

iii)	
	(1) Simultaneous production and consumption means
	(a) consumers are a part of the service process;
	(b) We must manage the interaction for customer satisfaction;
	(c) educate consumers about the service process and their role in it.
iv)	
	(1) Services cannot be inventoried, so it is hard to balance capacity and
	demand;
	(2) cannot return service for credit or exchange;
	(3) need to manage demand in peak periods; use capacity in off-periods

VI. Inventory carrying costs of services depend on the cost of employees and equipment

(4) Idle production capacity

LOW	COST	Cost of inventory			HIGH COST		
Real estate agency Hair salon	Insurance	Dry cleaner	Auto repair center	Restaurant	Hotel	Amusement park	Airline Hospital

VII. Levels of Service

i) Quality products

iii) Qualified Sales/Service personnel

ii) Right price

a)	Сс	ore/Primary Services	
	i)	The major activity of a business (or nonprofit organization).	
	(1) Example: Investment Services provide the use of a brokerage account to buy and sell stocks		
		(a)	
		(b)	
b)	An	cillary Services

		(1)	
		(2)	
	ii)	Ancillary Services expected in B2B marketing	
		(1)	
		(2)	
		(3)	
VIII.	Se	rvice as Value	
a)	Cc	onsumers & Organizational Buyers want:	

iv) Maximum benefits
v) Minimum effort
vi) Low wait times
vii) In other words, they demand!
(a) Example: The Casual Dining Industry stopped providing "value"
(b) Casual Dining restaurants provide full-service, alcoholic
beverages, and CHECK AVERAGES from \$10 to \$23 per person.
(c) COMPETITION from "fast-casual" chains are stealing customers
(d) Fast-casual chains have no waiters and higher quality food than
fast food chains.
(i)
(ii)
(iii)
(iv)
(v)
IX. VALUE
a)an intangible concept often defined in terms of
i) exceptional
ii) exceptional
iii) value-based

- (a) Example: Casual chains learn from recession
 - (i) During the recession many consumers pulled back on their discretionary spending, which meant eating out at restaurants less frequently if at all.
 - (ii) While economic conditions have begun to improve in the U.S., many consumers are still watching their wallets - preferring to eat at less expensive casual dining chains over pricier upscale restaurants.
 - (iii) Restaurant operators were poorly positioned heading into the recession in 2008 because they had too restaurants.
 - (iv) But the dining chains learned. 30,000 restaurants have closed since then and companies focused more on improving their menus, service and the atmosphere at their storefronts.
 - (v) In 2007, the industry's mentality was "build it and they will come," but today successful restaurant companies are driven by a guest-centric planning process.
 - (vi) That is, casual chains are returning to a "value service proposition."

X. Competitive Positioning

- a) Service Image is conveyed by the firm's "service products."
 - i) The dimensions used should be those valued by the customers.
 - (1) Example: What DO consumers want in Casual Dining?
 - (a) Stand for something UNIQUE
 - (i) Cheesecake Factory

1.

(ii) Outback

1.

(iii) Olive Garden

1.

(b) Lower Prices

(c) BETTER FOOD

- (i) Casual dining was initially successful because it provided better food quality than fast food, at a very reasonable price
- (ii) Recently, fast food's quality has gone UP with prices rising only slowly
- (iii) BUT, casual dining's price have risen while food quality and innovation has stagnated!
- (iv) RUBY TUESDAY is upgrading its food, but it prices are still pretty high.

(d) IMPROVED SERVICE

- 1. Slow service
- 2. Discourteous staff
- 3. Are NOT what consumers are looking for!!
 - a. Chili's is trying to cut 15 minutes from its 45-minute lunch by testing BlackBerry's that connect directly from the server to the kitchen.
 - b. Chili's is also improving its employee hiring practices
 - c. And the staff is wearing more professional looking aprons

(e) Better looking stores

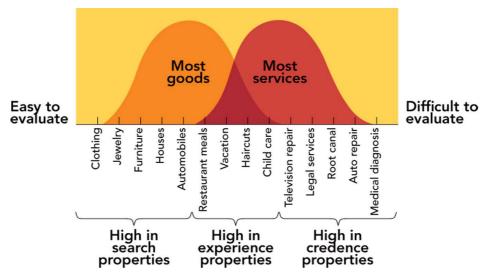

- 1. Most stores are 20-years old!
 - a. Ruby Tuesday has redesigned all of its company-owned stores with contemporary designs and lighter colors.
 - b. Lone Star is replacing concrete floor with wood and is installing oak tables.

2. Get kid-friendly

- Families are a big part of the casual dining industry's market
- b. Could restaurants have kid playgrounds? Loaner hand held video games?

XI. Se	rvice Leadership or Follow the Leader?		
a)	Will you set the service standard or wait for competitors to set the standard and then follow their lead?		
	i) Example:		
XII.	Benefits of Exceptional Customer Service		
a)	Exceptional Customer Service can from Competitors		
	i) Services attract & keep customers		
	ii) Services and recover lost sales		
	iii) Service quality is related to customer satisfaction		
	iv) Customer Service usually leads to a profitable ROI in the long term		
XIII.	HOW CONSUMERS PURCHASE/EVALUATE SERVICES		
a)	The Purchase Process		
	i)Properties		
	(1) What consumers can judge prior to the purchase		
	(a) Price, location, appearance of physical facilities, paperwork, interactions with the service provider's staff		
	ii) Properties		
	(1) Attributes discernable only during or after the service experience		
	(a) Physical comfort; staff concern		
	iii) Properties		
	(1) Attributes inferred from a subjective evaluation of the entire process.		

-- Exceptional Customer Service Seminar:

XV. The Service Design Process

- a) Customer Targets
 - i) What do they want?
- b) Nature of the Service
 - i) Complex (medicine, investments) = substantial support services and highly qualified customer contact people
- c) Pricing?
 - i) Who is the target?
 - (1) How much and how often do they buy?

- ii) What is the type of service?
- iii) Can a fee be "justified?"
- d) Pricing--Costs
 - i) Wages
 - ii) Physical facilities
 - iii) Technology & Equipment
 - iv) Honoring warranties and guarantees
- e) Degree of Complexity/Uncertainty
 - i) When complex, customers may need extensive sales assistance, demonstrations, service guarantees, after sale assistance, pre-purchase information
- f) Marketer's Resources
 - i) Smaller marketers may need to outsource some customer services to save costs (pros and cons to this).
 - ii) When to use customer service outsourcing (http://www.buyerzone.com/marketing/call_center/tmm-customer-service-outsourcing.html)
 - (1) Significant growth
 - (2) Save money
 - (3) Testing and learning
