## OhioLINK DMS Survey of Cataloging Expertise

OhioLINK's Database Management and Standards (DMS) committee is surveying OhioLINK libraries to create an inventory of cataloging expertise within OhioLINK's libraries. By sharing the results of this survey behind the OStaff login we hope to facilitate cooperative cataloging initiatives within OhioLINK.

DMS is seeking information about specific types of cataloging expertise. We want to find out which libraries have or need expertise in languages, formats, subjects and technologies. These needs are often sporadic or occasional. We also want to discover which libraries are willing to share, barter or contract for that expertise. The creation of a directory from these survey results will allow libraries to seek assistance from each other under circumstances that they will be able to negotiate individually.

Please fill out the following by checking in the appropriate boxes and providing text as requested. If you are unsure or don't know about your institution's expertise for a specific area then please leave the boxes blank for that area. Institutions that wish to not be included in the directory are asked to complete the survey and select the opt-out button at the end.

### Language Expertise

What types of language expertise are you confident your technical services unit is capable of performing? What types do you find you need assistance with? Please check in the appropriate cells below to indicate the ways you could cooperate with OhioLINK libraries. If you are including more than one language in a family use other boxes at the bottom. Please also indicate family.
