Choose your Own Adventure

Automation System
1. Will you continue to display/load/impose the GMD?
2. How will you display the 3XX fields (labels, system opportunities and limitations)?
3. How will you display and index the 264 (labels, system opportunities and limitations)?
4. What automated processes need to be adjusted to accommodate RDA?

Authorities
1. How will you plan to update a massive number of authority records and their headings?
2. For those with automated authorities processing, how do you flip remaining headings to current form?
3. How much time and effort should catalogers spend building differentiated NARS?
4. Do you plan on displaying the 678 field to the public [bibliographical or historical note]?
5. How will you manage the changes to conference headings?

Original Cataloging Policies
1. There is a core level record standard for RDA. LC has adopted standards at a higher level than this core. What is your floor?
2. Will you never catalog in RDA, will you only catalog in RDA or will you catalog in both content standards?
3. When there are four or more authors in an RDA record, how many access points do you generally create?
4. Will you allow for different policies for different types of materials (rare books, for example)?
5. Will you continue to enter ISBD punctuation so long as RDA is in MARC?
6. Will you follow OCLC policy that prefers sentence case over all caps, even if the title is in all caps?

Complex Copy, Near Copy and Record Upgrade Policies
1. If you are upgrading an AACR2 record, do you upgrade to RDA?
2. If you are upgrading or creating a RDA record that is linked to other titles, is it necessary to go back and upgrade the linked titles to RDA?
3. Will you make record changes only in your own catalog, or will you upgrade master records at the network level and share the work?
4. If upgrading an RDA record to full, will you focus on turning legitimate caps into sentence case?

Copy Cataloging Policies
1. Will you accept AACR2 records or upgrade them to RDA?
2. What will your copy-cataloging standards be for RDA records?
3. Will the overall quality of the record drive your decision-making regarding whether to accept a record (regardless of the content standard)?
4. What are your cataloging vendors doing regarding RDA?

Hybrid Record Copy Cataloging Policies
1. Will you accept hybrid records as-is, or re-describe them fully in RDA?
2. What RDA enhancements are acceptable to you and which are not?
3. How will hybrid records change your workflow through acquisitions and cataloging?

Legacy Data
1. Do you plan to make your legacy AACR2 data more RDA-like?
2. Are you averse to having RDA headings in AACR2 records when you have an authority record? What about when you don't have one?

Consortial Issues
1. Do you need to coordinate your decision-making within a consortium?
