

**RECORD OF PROPOSED CHANGES FOR THE NEXT TIME WE REINDEX FOR TITLE**

1. Consider adding \$g to the following fields as OhioLINK indexes this for title. Was NOT indexed as part of the process which defined the "Note Slice" for the AVS indexing:

130  
240  
243  
400.0  
730  
800  
830

2. In the 411 field, we index \$g [Miscellaneous information] and OhioLINK doesn't. OhioLINK indexes \$s [Version] and KentLINK doesn't.
3. Consider taking 505 \$t out of the title index.
4. Add 780 and 785 to title index.
- 5.

**RECORD OF PROPOSED CHANGE IF WE EVER DECIDE TO RE-INDEX FOR MESH:**

1. We need to index \$v in 650.2
2. We need to index \$v in 651.2
