Marginal Rates of Substitution

When they are on the contract curve,
 $MRS_{AB}^S = MRS_{AB}^H$

Marginal Rates of Substitution

When they are on the contract curve,
 $MRS_{AB}^S = MRS_{AB}^H$

If not, trading is possible.
 Suppose
 $MRS_{AB}^S = 4$
 $MRS_{AB}^H = 3$

Then trade

Two Qualifications

- Consumer Sovereignty

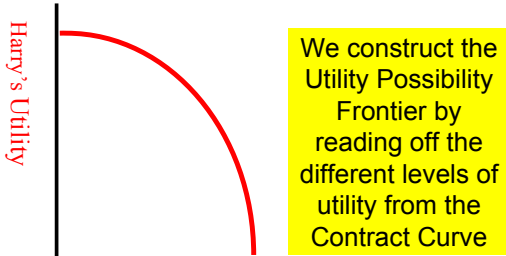

Two Qualifications

- Consumer Sovereignty
 - Are we comfortable with welfare checks being spend on drugs and alcohol?
 - Do we think children know what is best for them?

Two Qualifications

- Consumer Sovereignty
- Do we have anything to say about the right point on the contract curve?

The Core and Markets

- The yellow area is the **core**.

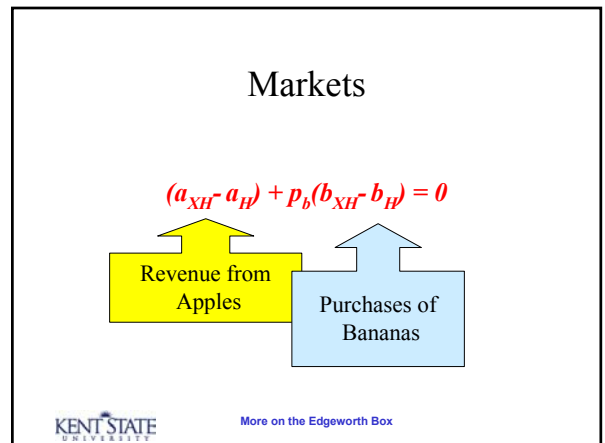

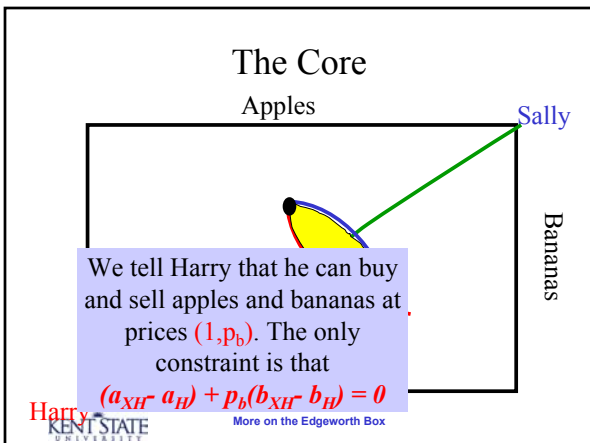

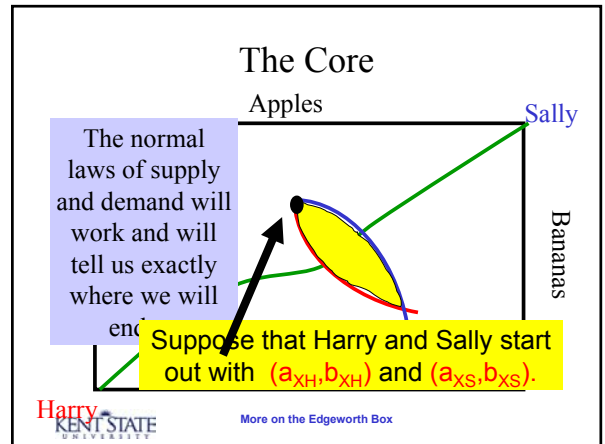

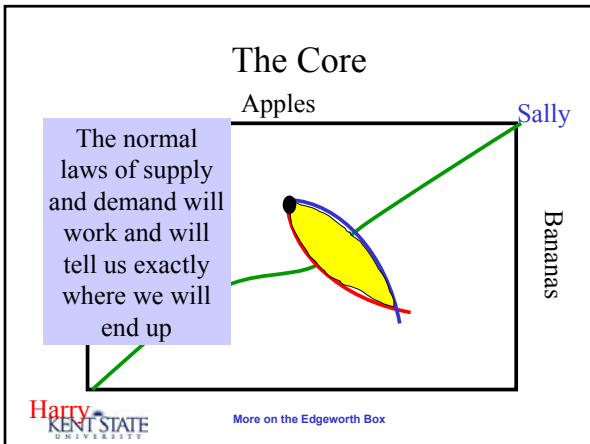

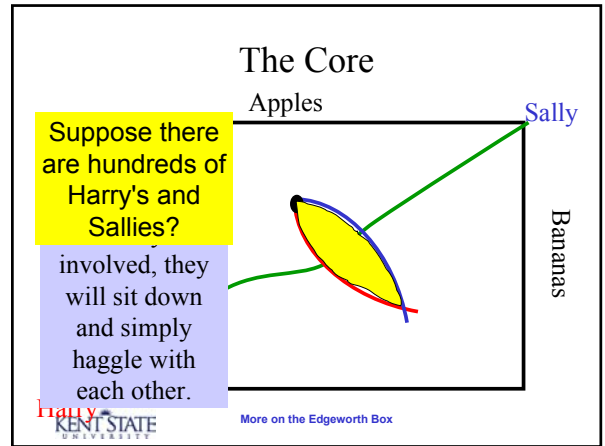

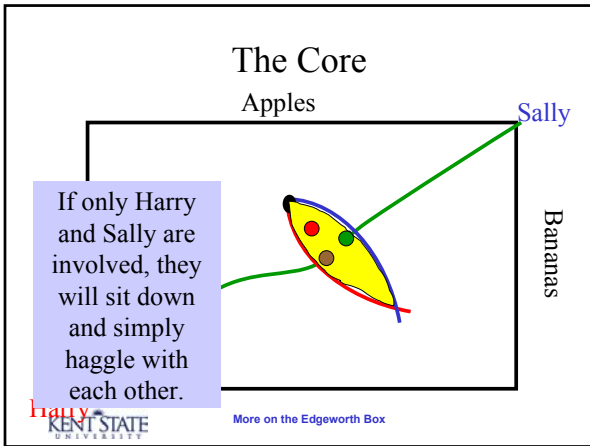

KENT STATE UNIVERSITY
More on the Edgeworth Box

The Core and Markets

- The yellow area is the core.
- If only Harry and Sally are involved, they will sit down and simply haggle with each other.

KENT STATE UNIVERSITY
More on the Edgeworth Box

The Core

Apples

Sally

Bananas

If Harry's budget line is the dotted line, he will want to move to Z.

KENT STATE UNIVERSITY

More on the Edgeworth Box

Markets

- If Sally is told that she can buy and sell apples and bananas subject to a budget constraint

$$(a_{XS} - a_S) + p_b(b_{XS} - b_S) = 0$$

she will be willing to buy and sell.

KENT STATE UNIVERSITY

More on the Edgeworth Box

Markets

- If Sally is told that she can buy and sell apples and bananas subject to a budget constraint

$$(a_{XS} - a_S) + p_b(b_{XS} - b_S) = 0$$

she will be willing to buy and sell.

- However** the price that persuaded Harry to move to Z, might or might not move her to Z.

KENT STATE UNIVERSITY

More on the Edgeworth Box

The Fundamental Theorem

For any starting point there is a price p_b which will lead both Harry and Sally to move to the same point on the contract curve.

KENT STATE UNIVERSITY

More on the Edgeworth Box

The Fundamental Theorem

For any starting point there is a price p_b which will lead both Harry and Sally to move to the

That is, there is a price that equates supply and demand. It puts Harry and Sally on the contract curve

Summary

- Normal trading gets Pareto Optimality in distribution.

$$MRS(\text{Harry}) = MRS(\text{Sally})$$

- More to Come
