IP Address Scheme for Class

1. Using VMware Workstation, select Settings for the virtual system you will be using.
2. For the Network setting, select "Host Only" for Adapter 1. (Use shared networking (NAT) only if you need the Internet.)
3. Start your virtual workstation environment.
4. Within the virtual environment, configure a static alternate IP Address for the TCP/IP properties as listed below.
5. For Folder Options, uncheck "Use simple file sharing (Recommended)".

IP Network:	192.168.214*.21 - 254
Subnet Mask:	255.255.255.0
Domain Controller:	192.168.214*.1
Default DNS:	192.168.214*.1
Default Gateway:	192.168.214*.1

Save 20 IP Addresses for Servers/Domain Controllers/Printers/Routers/Switches.
